

# Signox II Marking System

This workshop device is intended for bright and dark marking: The Signox II is 230V powered and sports a powerful transformer and a large rectifier with high output. It facilitates the use of large templates with up to 2,400 dpi as well as fast and powerful marking of large areas. The Signox II can handle dark marking as well as bright marking – which looks stylish, similar to laser engraving.

- Features**
- Powerful transformer for large markings
  - 230V powered
  - Suitable for large templates
  - Supplied with handy plastic storage box
